

Are you a dab-hand with a sewing machine?

Friends of Morgans are looking for volunteers to help with a fun recycling project – turning unwanted school uniform into some everlasting bunting in school colours! Please share with grandparents, friends, anyone who loves to sew!

We will supply material to anyone who is interested in making some fabric triangles for us to sew into school colours everlasting bunting. Please email friendsofmorgans@gmail.com to register your interest.

Cutting out

Step 1

Download, print out and cut around our free bunting template (below) – choose **borderless printing** so they're all the same size.

Step 2

Carefully draw around the paper template onto some card and cut out (this will make a stronger template that can be used over and over again).

Step 3

Using the template draw (on the wrong side of the fabrics) and cut out enough flags for the front and back of the bunting (two for each flag, one design for the front and a different design for the back).

Step 4

With right sides facing pin together a front and back for each flag.

Stitching the flags

Step 1

Using a ¼ inch seam and backstitching at the beginning & end (to secure stitches) sew along the two long sides of each flag (leave the top seam open) and snip the threads.

Step 2

Take out the pins and snip a little off the point to reduce bulk (do not cut too near the stitches).

Step 3

Turn the flags right way out, **carefully** poke out the point and press flat. Repeat this process to make the other flags.
